

1 SHOT

Fuel stabilizer

1 Shot Fuel Stabilizer is an additive we made to keep your fuel fresh.

You just pour the shot into your fuel tank (Gasoline or Ethanol) if you do not ride for a few days or you feel there is moisture in your fuel.

We didn't over complicate it, there are no gimmicks, no extras, just honest additives. We tested it in Vietnam, in hot and wet conditions, to be sure.

HOW TO USE: Simply pour 1 Shot (50ml) into your fuel tank (5L capacity). It can be used for regular daily driving as well as long-term fuel storage. If your fuel is not used for 1 month please use 1 and a half shot.

PACKAGING UNIT:

TECHNICAL DATA:

Technical Specifications	ASTM	Results ^(*)
Density at 20°C (kg/L)	D4052	0.787
Kinematic Viscosity at 40°C (cSt)	D7042	2.8
Flash Point PMCC (°C)	D93	80
Copper Strip Corrosion, 3h at 100°C	D130	Class 1
Soluble in used oil	-	Fully miscible
